ABOUT ME

A 4th-year IT Innovation student interested in cloud computing after building a real system through a university group project developing and deploying an AI chatbot using AWS Lambda, API Gateway, S3, DynamoDB, and other related foundational services. That experience revealed the potential of the technology and sparked a genuine interest in building systems that solve real-world problems. Eager to deepen this knowledge through hands-on experience, he's now seeking a Cloud Engineer / Cloud Support internship to learn from experienced professionals and build the infrastructure skills needed for a future in cloud engineering.

TECHNICAL SKILL

- OS & Infrastructure - Linux, Serverless Architecture
- AWS - Lambda, API Gateway, S3, DynamoDB
- Programming , Python, HTML, CSS, JavaScript

SOFT SKILL

- Teamwork & Collaboration
- Communication , Problem-solving
- Time Management
- Critical Thinking , Adaptability

LANGUAGE

- English (Speexx B1)
- Thai (Native)

PROJECTS

Winstaller - Web on Wordpress 2026

group / Academic Project | Backend Developer

- Developed and maintained the system on WordPress hosting (InfinityFree) designed the competition data structure using CPT UI and ACF, along with a role-based access system (Ultimate Member, User Role Editor).
- Maintained system security and backups using Wordfence, WP Activity Log, and UpdraftPlus.

Chat Pop - Serverless AI Chatbot on AWS 2025

group / Academic Project

- Built a serverless AI chatbot on AWS: front-end on S3, backend on Lambda and API Gateway.
- Integrated Groq API for fast responses and DynamoDB for chat-session storage.
- Managed the full serverless deployment end-to-end, with no managed server.

EXPERIENCE

One Moby Senior Project - System Design & Front-End 2026 - present

Group Project · University capstone project with a real corporate client

- Designed a Competency Assessment system with 1Moby — 180° evaluation, gap analysis, auto-generated IDPs, gamified LMS
- Contributed to system architecture and front-end development and Conducted UX research to inform design

ETDA Bootcamp - Empowering Digital Citizens to Build Digital Trust 2026

Team One Day miracle · 5-day national bootcamp

- Attended a national program on Digital ID and Verifiable Credentials; applied VC/Digital Trust concepts to design and present a working prototype.

Vice President - IT Branch & CSDS Branch 2024 - 2025

Faculty of Information Technology Committee, Bangkok University

- Organized faculty-wide tech activities and events, strengthening organizational and communication skills.

EDUCATION

2023 -present

- **School of Information Technology and innovation - Bangkok University**
- **B.Sc. Information Technology**
- **GPA: 3.29**
- **Expected Graduation : 2027**
